Recreation Facilities and Amenities- select a Project Category below:

Routes and Surfaces- select a Project Category below:

Benefits of the Project

**Jaycee Park was renovated this year to include new landscape, new entry to playground, new sloped curb ramp and new playground equipment. Individuals with wheelchairs or strollers will have easier access to the playground area and the opportunity to use the adaptive swing. The tactile paving helps the visually impaired detect when they are about to leave the sidewalk and enter the street. The textured tiles make it easier for people to feel changes in patterns and textures signaling changes in a path, including a curb.**

Items that will become ADA Compliant

**This playground will have a concrete accessible route as a means of egress which replaced the old wood chips and gravel path. An accessible seat swing was installed. The sloped curb provides access to sidewalks and streets for those who use wheelchairs, walkers, or scooters. The new sloped curb has textured tiles.**

---

The project is designed or constructed, or applies human resources, to comply with:

**The 2010 Standards for Accessible Design**
