Keep in Mind

The questions introduced in 2008 pertaining to disabilities remain the same questions found in the current ACS questionnaires. They cover six disability types:

- Hearing difficulty deaf or having serious difficulty hearing
- Vision difficulty blind or having serious difficulty seeing, even when wearing glasses
- Cognitive difficulty Because of a physical, mental, or emotional problem, having difficulty remembering, concentrating, or making decisions
- Ambulatory difficulty Having serious difficulty walking or climbing stairs
- Self-care difficulty Having difficulty bathing or dressing
- Independent living difficulty Because of a physical, mental, or emotional problem, having difficulty doing errands alone such as visiting a doctor's office or shopping

Respondents who report anyone of the six disability types are considered to have a disability in the eyes of ACS data

Keep in Mind

The American Community Survey includes a question that intends to capture current sex; there are no questions about gender, sexual orientation, or sex at birth. Respondents should respond either "male" or "female" based on how they currently identify their sex.
