Benefits of the Project	upgrade the push assist buttons on power doors to be touchless and better timed for easier access. The new touchless sensors allow the doors to open with adequate time for guests to enter or exit. The hands free sensor reduce surface contact for a healthier entry.
Items that will become ADA Compliant	The Garden Terrace double doors now open with a wave sensor instead of a push button which is cleaner and properly timed. The Pavilion Aquatic entrance double doors now open with the same system and proper timing.

The project is designed or constructed, or applies human resources, to comply with:

Rather than replace the existing doors, frames and hardware, the older push button sensors were replaced with touchless, wave sensors and adjusted for the proper amount of time to be open for guests. This allows patrons to more efficiently and safely enter the building.
